

NON WOVEN ABRASIVES in, jumbo rolls, small rolls, sheets.

The materials NON-WOVEN- abrasives are used for cleaning, finishing and surface preparation. For wood, metal, composites and are used in many industries. They are made of synthetic nylon fibers impregnated with abrasive grains ALOX or SiC and binder resins . The open structure prevents clogging during processing and generates an air flow which reduces overheating. The flexible structure offer a uniform contact in all conditions especially during the processing of contoured surfaces, giving a beautiful finish and reducing scratches. Designed for a long life time and give a steady performance of the abrasive grain .

Ideal for SATIN FINISHING .!

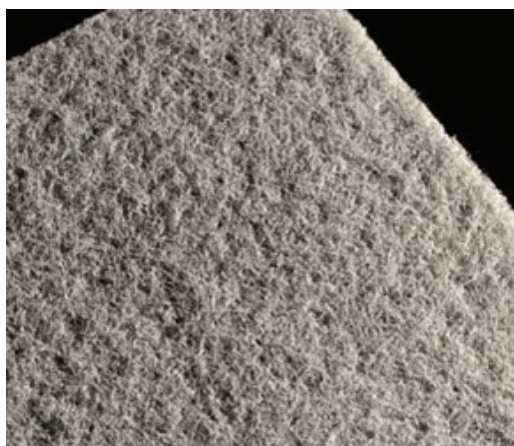

TECHNICAL SHEET (1)

Name:	A-FINE
Type of Mineral:	Aluminium oxide
Grit:	320
Available Sizes:	Rolls, sheets
Jumbo Rolls Size:	0,92m x 120m
Sizes Obtained:	Small rolls 115mm x 10m

TECHNICAL SHEET (2)

Name:	A-VERY FINE
Type of Mineral:	Aluminium oxide
Grit:	400
Available Sizes:	Rolls, sheets
Jumbo Rolls Size:	0,92m x 120m
Sizes Obtained:	Small rolls 115mm x 10m

TECHNICAL SHEET (3)

Name:	S-UFINE
Type of Mineral:	Silicon carbide
Grit:	600
Available Sizes:	Rolls, sheets
Jumbo Rolls Size:	0,92m x 120m
Sizes Obtained:	Small rolls 115mm x 10m

Technical details:

Non woven model	dimensions	material	color
Fiber roll "A" fine #320	115 mm x 10 mts.	aluminium oxide	purple
Fiber roll "A" very fine #400		aluminium oxide	RED
Fiber roll "S" ultra fine #600		silicon carbide	GREY
			LIGHT GREY
