A37F Film with Velcro backing abrasive

Specifications & application:

The backing of A37F is polyester film, with perfect flat surface and high strength. It can be used for both wet and dry application. Provides fast cutting and long lasting life and reduce work time. A37F can be used as Velcro and PSA disc, and also suitable for different curved surfaces and paint polishing. Adopting the special treated high grade grain, semi-open strew grain technology and partial grits have special anti-clogging stearated coating. Which can prevent clogging and stick efficiently. Excellent for contour sanding without folding ,especially suitable for sanding auto putty and primer. Also for wood grinding.

Abrasive net

Specification & application:

Abrasive net is unlike with any other abrasive products. The dense network construction make it easy to stick on the pad and fast to change the abrasive discs. The open weave net structure means that it is virtually dust free sanding. so that the grinding area and dust area optimization. Can help improve grinding and dust efficiency.

Abrasive net are so efficient at removing potentially dangerous sanding dust, they minimise dust contamination in the workplace and create a far healthier environment.

Abrasive net is widely used in automobile repair, wood processing and so on.

A50M CERAMIC abrasives with Velcro backing

Specifications & application:

Purple color A50M using special paper and abrasive grain, adopting advanced technology makes the product with the new appearance purple color. Longer life than traditional dry paper. This product combines excellent dust removal and fast cutting, long lasting abrasive for higher productivity and lower cycle times. Has high efficiency and long life and special coating makes anti clogging effect. Purple color A50M is mainly used in automotive market, paint, putty, glass fiber and reinforced plastic, Primer filler and so on. It also has the good extensibility. It can be converted into velcro disc and paper roll.

A33M Yellow color (GOLD) Velcro abrasives

Specification & application:

A33M is a special product suitable for fast sanding. Premium aluminum oxide mineral is durable, cuts fast, and performs well on many surfaces. Strong, C-weight paper backing supports aggressive sanding with extra durability compared to lighter weight paper backings. Semi-open coat construction and load-resistant coating prevent premature loading of A33M surface to maximize cut and extend abrasive life.

A33M is mainly used in form of Velcro disc, PSA disc, sheet 9"*11" and narrow roll. Durable A33M is well suited for high production sanding operations as well as general purpose applications on paint, primer, wood, metal, plastic, and composites, including fiberglass.
